NEW THINKING IN CONSERVATION

April 26-27, 2024

UC San Diego

Organizers:

Dale Jamieson, NYU, UCSD

Craig Callender, UCSD

While there are many microlevel conservation success stories, at the macrolevel conservation is failing. The workshop focuses on two

foundational questions that are implicated in this failure: a lack of clarity about conservation goals and values; and the political economy of the

conservation system itself. We hope that our analyses may contribute to achieving better practical outcomes.

Participants

Cristina Balboa

Marx School of Public & International Affairs
Baruch College, CUNY

Craig Callender

Philosophy
Institute for Practical Ethics
UC San Diego

Shermin de Silva

Ecology, Behavior & Evolution
UC San Diego

Kristy Ferraro
